

Regulatory Data Sheet

GRADES:

- Alkatuff[®] - LL705UV, LL710UV, LL711UV.

- Food Contact Compliance

If this product is used for food contact applications, then the user needs to ensure compliance with the requirements of AS 2070-1999 and relevant food contact regulations.

When used in accordance with US Food and Drug Administration (FDA) application guidelines, this product meets the requirements of FDA 21 CFR 177.1520 (c) 3.1a and AS 2070-1999 section 4.1.1(a). This product contains UV light stabilisers and so end use restrictions as described in FDA 21 CFR 176.170 (c) table 2 conditions D to G apply. Volume and food type restrictions may apply. This product should not be used in applications for holding food during cooking without the required compliance testing. This information is only for the application described on the Technical Data Sheet. For alternative applications please contact your primary Qenos representative.

The composition of this product complies with the requirements of Commission Regulation (EU) No 10/2011, including any subsequent amendments that are in force prior to the effective date of this Regulatory Data Sheet. Migration limits and other restrictions may apply. Please contact your primary Qenos representative if you require a declaration of compliance or further information.

It is the responsibility of the manufacturer of the finished food contact article, as well as the industrial food packer, to ensure the composition of the food and its organoleptic properties are not altered by the final article.

- Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

Substances of Very High Concern (SVHC) as defined in Article 57 of Regulation (EC) 1907/2006 ("The REACH Legislation") and listed on the Candidate List for inclusion to Annex XIV or Annex XIV itself (as of the effective date of this Regulatory Data Sheet) are not intentionally used in the manufacture of Qenos polyethylene grades. However, these substances are not routinely tested for. For further information regarding REACH please contact your primary Qenos representative.

- Adipates

Adipates, including those listed below, are not intentionally used in the manufacture of any Qenos polyethylene grades. Qenos has in place quality assurance systems to reasonably ensure that adipates are not inadvertently added. However, these substances are not routinely tested for.

- Bis(2-ethylhexyl) adipate (DEHA) (CAS number 103-23-1)
- Dibutyl adipate (CAS number 105-99-7)
- Diethyl adipate (CAS number 141-28-6)
- Ethyl hydrogen adipate (CAS number 626-86-8)
- Dioctyl adipate (DOA) (CAS number 123-79-5)
- Dimethyl adipate (CAS number 627-93-0)

- Allergens

The following substances are not intentionally used in the manufacture of any Qenos polyethylene grades. Qenos has in place quality assurance systems to reasonably ensure that allergenic substances are not inadvertently added. However, these substances are not routinely tested for.

- Cereals containing gluten (i.e. wheat, rye, barley, oats, spelt, kamut or their hybridised strains) and products thereof
- Crustaceans and products thereof
- Eggs and products thereof
- Fish and products thereof
- Peanuts and products thereof
- Soybeans and products thereof
- Milk and products thereof (including lactose)
- Tree nuts and products thereof
- Celery and products thereof
- Mustard and products thereof
- Sesame seeds and products thereof
- Sulphur dioxide and sulphites
- Lupin and products thereof
- Molluscs and products thereof

- Bisphenol A (BPA) and Bisphenol S (BPS)

Bisphenol A (CAS number 80-05-7) and Bisphenol S (CAS number 80-09-1) are not intentionally used in the manufacture of any Qenos polyethylene grades. Qenos has in place quality assurance systems to ensure that BPA or BPS are not inadvertently added. However, BPA and BPS are not routinely tested for.

- *Bovine Spongiform Encephalopathy (BSE) and Transmissible Spongiform Encephalopathy (TSE)*

Qenos confirms that all raw materials and additives used in the manufacture of this product have been derived only from inorganic, synthetic and / or vegetable based feedstock.

- *Butylated hydroxytoluene (BHT)*

Butylated hydroxytoluene (CAS number 128-37-0) is not intentionally used in the manufacture of any Qenos polyethylene grades. However, BHT is not routinely tested for.

- *Conflict minerals*

Tin (CAS number 7440-31-5), tantalum (CAS number 7440-25-7), tungsten (CAS number 7440-33-7), gold (CAS number 7440-57-5), columbite-tantalite (coltan), cassiterite and wolframite (CAS number 1332-08-7) are not intentionally used in the manufacture of any Qenos polyethylene grades. Qenos also has in place quality assurance systems to reasonably ensure that conflict minerals are not inadvertently added. However, these substances are not routinely tested for.

- *Degradable additives*

For the purpose of this data sheet, degradable additives are defined as additives used to intentionally accelerate the fragmentation of plastic material into smaller pieces. The degradation is often triggered by ultraviolet radiation or heat exposure. Degradable additives, including oxo-degradable additives, are not intentionally used, in the manufacture of any Qenos polyethylene grades. Qenos also has in place quality assurance systems to reasonably ensure that degradable additives are not inadvertently added. However, these substances are not routinely tested for.

- Epoxy Derivatives

The following epoxy derivatives are not intentionally used in the manufacture of any Qenos polyethylene grades. Qenos has in place quality assurance systems to reasonably ensure that these substances are not inadvertently added. However, these substances are not routinely tested for.

- Bis(hydroxyphenyl)methane bis(2,3-epoxypropyl) ether (BFDGE) (CAS No. 39817-09-9)
- Novolac glycidyl ethers (NOGE)
- 2,2-bis(4-hydroxyphenyl)propane bis(2,3-epoxypropyl) ether (BADGE) (CAS No. 1675-54-3) and some of its derivatives:
 - 2,2-bis(4-hydroxyphenyl)propane (2,3-dihydroxypropyl) glycidyl ether (BADGE.H₂O) (CAS No. 76002-91-0)
 - 2,2-bis(4-hydroxyphenyl)propane bis(2,3-dihydroxypropyl) ether (BADGE.2H₂O) (CAS No. 5581-32-8)
 - 2,2-bis(4-hydroxyphenyl)propane (3-chloro-2-hydroxypropyl) glycidyl ether (BADGE.HCL) (CAS No. 13836-48-1).
 - 2,2-bis(4-hydroxyphenyl)propane bis(3-chloro-2-hydroxypropyl) ether (BADGE.2HCl) (CAS No. 4809-35-2)
 - 2,2-bis(4-hydroxyphenyl)propane (3-chloro-2-hydroxypropyl) 2,3-dihydroxypropyl ether (BADGE.H₂O.HCL) (CAS No. 227947-06-0)

- Halal and Kosher

Qenos is unable to make specific claims regarding the Halal and Kosher suitability of its products. However, Qenos confirms that all raw materials and additives used in the manufacture and formulation of this product have only been derived from inorganic, synthetic and / or vegetable based substances.

- Hazard Analysis Critical Control Points (HACCP)

Qenos produces polyethylene which is subsequently converted by its customers into a variety of products, including food packaging applications. As Qenos is not a direct manufacturer of food contact packaging, Qenos does not operate a certified HACCP system. Qenos' manufacturing practices in relation to polyethylene intended for food contact applications are designed to comply with the requirements of Standard 1.1.1-10 (subsections 10 & 11) of the FSANZ Food Standards Code "Requirements relating to food for sale – Packaging requirements" and AS 2070-1999 "Plastics Materials for food contact use".

Qenos has a documented food contact management policy and food contact compliance committee, which stewards its obligations against AS 2070-1999 and other related food contact requirements. Qenos will assist customers in relation to HACCP enquiries by providing support of customer audits of its food contact and product quality management systems.

- Heavy metals and Restriction of Hazardous Substances (RoHS)

This product is not manufactured to intentionally include lead (CAS number 7439-92-1), mercury (CAS number 7439-97-6), cadmium (CAS number 7440-43-9), hexavalent chromium (CAS number 18540-29-9), polybrominated biphenyls (PBB), polybrominated diphenyl ethers (PBDE), di-2-ethylhexyl phthalate (DEHP, CAS number 117-81-7), benzyl butyl phthalate (BBP, CAS number 85-68-7), dibutyl phthalate (DBP, CAS number 84-74-2) and diisobutyl phthalate (DIBP, CAS number 84-69-5). Qenos also has in place quality assurance systems to reasonably ensure that heavy metals and substances stated in the RoHS list are not inadvertently added. However, these substances are not routinely tested for.

- Melamine

Melamine (CAS number 108-78-1) is not intentionally used in the manufacture of any Qenos polyethylene grades. Qenos has in place quality assurance systems to reasonably ensure that melamine is not inadvertently added. However, melamine is not routinely tested for.

- Nanomaterials

Nanomaterials, as defined by European Commission Recommendation 2011/696/EU, are not intentionally used in the manufacture of Qenos natural polyethylene grades. Qenos has in place quality assurance systems to reasonably ensure that such nanomaterials are not inadvertently added. However, nanomaterials are not routinely tested for.

- Natural Rubber or Latex

Natural rubber or latex (CAS number 9006-04-6) is not intentionally used in the manufacture of any Qenos polyethylene grades. Qenos also has in place quality assurance systems to reasonably ensure that natural latex or rubber is not inadvertently added. However, natural rubber and latex are not routinely tested for.

- 4-nonylphenol (4NP) and Tris(nonylphenyl) phosphite (TNPP)

4-nonylphenol (4NP) (CAS number 25154-52-3) and tris(nonylphenyl) phosphite (TNPP) (CAS number 26523-78-4) are not intentionally used in the manufacture of any Qenos polyethylene grades. Qenos has in place quality assurance systems to reasonably ensure that 4NP and TNPP are not inadvertently added. However, 4NP and TNPP are not routinely tested for.

- Per- and polyfluoroalkyl substances (PFAS)

Per- and polyfluoroalkyl substances (PFAS) are not intentionally used in the manufacture of the above Qenos polyethylene grades. Qenos has in place quality assurance systems to reasonably ensure that PFAS are not inadvertently added. However, these substances are not routinely tested for.

- Phthalates

Phthalates, including those listed below, are not intentionally used in the manufacture of any Qenos polyethylene grades. Qenos has in place quality assurance systems to reasonably ensure that phthalates are not inadvertently added. However, these substances are not routinely tested for.

Phthalate	CAS No.
Di-2-ethylhexyl phthalate (DEHP)	117-81-7
Di-n-octyl phthalate (DNOP)	117-84-0
Benzyl butyl phthalate (BBP)	85-68-7
Diisodecyl phthalate (DIDP)	26761-40-0 / 68515-49-1
Diisobutyl phthalate (DIBP)	84-69-5
Diisononyl phthalate (DINP)	28553-12-0 / 68515-48-0
Diethyl phthalate (DEP)	84-66-2
Dibutyl phthalate (DBP)	84-74-2
Dimethoxyethyl phthalate (DMEP)	117-82-8
Bis(2-butoxyethyl) phthalate (BBEP)	117-83-9
Diisohexyl phthalate	71850-09-4 / 146-50-9
Dipentyl phthalate	131-18-0
Dihexyl phthalate (DHP)	84-75-3
Dinonyl phthalate (DNP)	84-76-4
Diphenyl phthalate	84-62-8
Dimethyl phthalate (DMP)	131-11-3
Dicyclohexyl phthalate (DCHP)	84-61-7
Dipropyl phthalate	131-16-8
Diisooctyl phthalate (DIOP)	27554-26-3
Dimethylcyclohexyl phthalate (DMCHP)	27987-25-3
Diallyl phthalate	131-17-9

- *Recycled Plastic Material*

Qenos confirms that recycled plastic or recycled plastic materials and articles as covered by the scope of Commission Regulation (EU) 2022/1616 are not used in the manufacture of Qenos polyethylene grades. Qenos has in place quality assurance systems to reasonably ensure that recycled plastic materials are not inadvertently added.

In using Qenos Pty Ltd's products, you must establish for yourself the most suitable formulation, production method and control tests, to ensure the uniformity and quality of your product in compliance with all laws. You should ensure that you have conducted your own investigations before making any representations as to your product's compliance with any regulatory standards. No warranty is given in relation to the information contained in this document.

This document is valid from the date of this statement and supersedes all previous statements relating to the subject matter prior to the effective date.
